Whitepaper

Introduction

FREEPORT  attraction

FREEPORT

FREEPORT is An evolvable
and free economic ecosystems.

Millions of AI citizens have their Asset Rights through smart contracts.

We built up a ecosystems similar to reality. Every players are able to play any roles and undertake different social divisions of labor they want. Each of you are indispensable for Freeport ecosystems.

All assets (NFT) in the physical sense must be produced by the skills of citizens who use the raw materials.

Growing your network, improving favorability with people and AI citizens, you will have better game experience. Moreover, you might benefit more from it.

Urban plan

(Specific Area Instance)

Urban planning also included
in the ecosystems. Materials
are necessary.

FREEPORT

FreeTown

(BSC Pre-Alpha test)

2022.1.18

beginner village

100 lands and 100 AI citizens

FreePort

(BSC Mainnet)

2022. June

Total 250,000 lands

(50K of lands owned by AI citizens)

FreeWorld

BSC Mainnet

2022. September

New Instance: Specific Area

Total 100 of urban plan are tendering in staged. Each of urban plan will have 10k of lands. Winning bidder are able to decide its business mode and taxes.

Building tools will supply by Freeport Team. Winning bidder could be A

address or DAO.

FreeTown
MAP

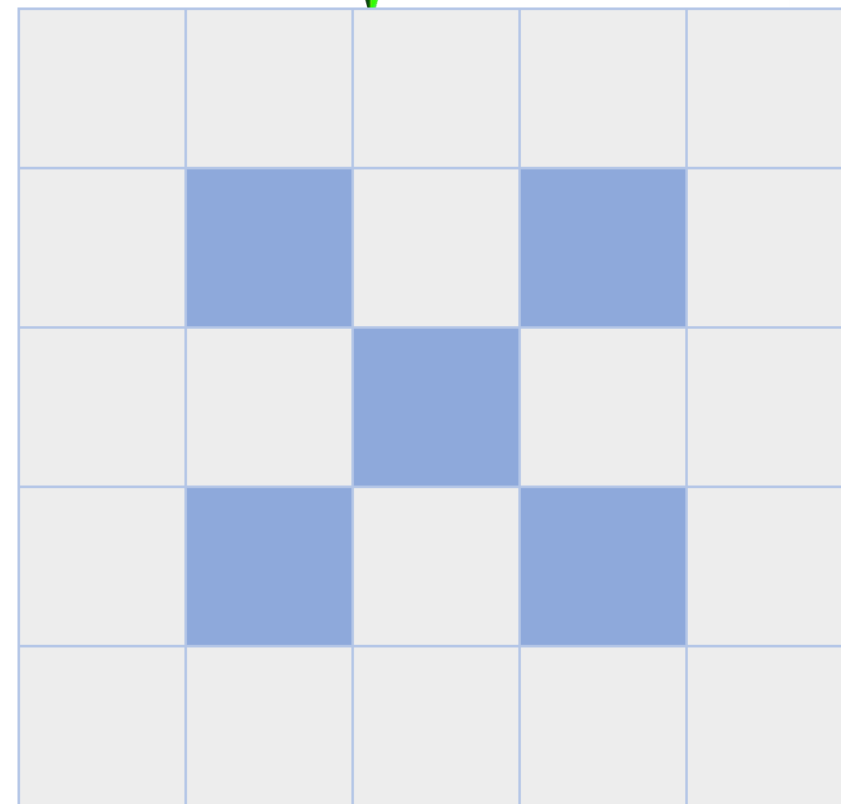

FREEPORT

Experiential version of the town with 100 of lands during Pre-Alpha test.

Freeport Diagram

FREEPORT

Each district have 10K of lands, blue district means owned by AI citizens. So there are 250K of land above.

FREEPORT

- ◆ Specific Area could be a guild.
- ◆ Specific Area have tax system.
- ◆ Entire Building material in Specific Area are produced by Freeport citizens.

Example:

- ◆ (Urban plan) Casino / Amusement / Mall / Business district (Partnering) / Red-light district
- ◆ (Gaming) If an user wanted to build a zombie town then players were able to fight it and get specific material, owner should cast entire material required to build it up.

FREEPORT

Economy

Economy

Increase liquidity(LPs)

>>The one of most basic and important thing on economy.
Entire citizenship of income will add to liquidity contract.

Decrease token(MTC) in circulation

>>Whole the lands are minted by MTC and the payment will be locked for 3 years. Entire Specific Areas of incomes will be burned.

Token(MTC) redeemable

>>Token will be locked after sell, unless it fall on debut price. If so people can redemption their token by their citizenship NFT to smart contract.

Promotion to communities

>>Usiing asymmetric cryptography tech in-game wallet, players dont need to have another decentralized wallet. Exchange will be only necessary to deposit and withdrew tokens like Binance.

Material Logistics

NFT minted by material

>> NFT item minted by material, people mining material is helpful for economic circle.

Virtual start-up

>> Although items are available to trade on marketplace, each of city and town are financial independence. People are able to purchase lands, stores, start up work studio, mint item, equipment and rent it to other players. Not only to trade with people, but also AI citizens purchase items from players.

Extensions

>> AI black market, in-game monsters are able to purchase equipment from black market. Killing monster might get their equipment. It helps economy working.
